

Forged Steel Globe valve

Product Profile

Forged steel valve is mainly used for controlling the flow of air, water, steam, corrosive medium, mud, oil, liquid metal and radioactive medium. Compared with other valve products, forged steel valve is characterized by high temperature and high pressure resistance, unique self-sealing design, the higher the pressure, the more reliable the seal. Due to the performance and technical characteristics, the special working conditions of the product also formed other products can not replace the characteristics.

Forged steel valves can be classified into forged steel check valves, forged steel gate valves, forged steel ball valves, forged steel globe valves, self-sealing gate valves, self-sealing globe valves, self-sealing check valves, forged steel needle valves, forged steel insulation valves, high-pressure forged steel gate valves, forged steel bellows valves, etc.

Product Range

Size: 3/8" ~ 2 1/2"

Rating: 800LB, 150LB ~ 2500LB

Materials: Carbon Steel, Stainless Steel, Alloy Steel, etc

Trim: 13Cr, Stainless Steel

End Connection: RF, BW, NPT, SW

Operation: Handwheel, Motor

Bore: Full Port or Reduced Port

Type: Optional Bolted or Welded or Pressure Seal Bonnet (gate, globe, piston check valve)
